To Whom it May Concern

Muhammad Aashir has successfully completed the tenure at the Artificial Intelligence and Machine Learning Lab at the National University of Computer and Emerging Sciences. He was a Machine Learning Researcher at the lab from 20 August 2022 to 1st July 2023.

He worked on Multimodal Hate speech Detection for Urdu Language. He excelled in curating a comprehensive Urdu dataset and developing advanced multimodal models for hate speech detection. Furthermore, he implemented cross-modal fusion techniques, such as Late Fusion and Early Fusion, as part of his approach.

He has a genuine passion for computation, encompassing the practical and theoretical branches of modern computer science. I have witnessed several examples of his intelligence and have been impressed by his ability to solve complex problems.

I wish his success in his future endeavors.

Mirza Omer Beg
Professor, Department of Computer Science
Head, Artificial Intelligence and Machine Learning Lab (AIM)
National University of Computer and Emerging Sciences
